Consultant Development Program

Build Your Career. Have Fun. Grow With Us.

Berlin & Frankfurt | Full-time | Unlimited Contract
Start: April, July & October

We are hiring recent university graduates to grow the next generation of services consultants through our Consultant Development Program. This is a high-impact, customer-facing role where you help solve complex business challenges and get to be hands-on with technology everyday.

We believe in pushing high potential people to achieve excellence. Our program is specifically designed to provide a challenging environment where you're expected to learn fast, contribute quickly, and are empowered with significant responsibility early.

You bring your drive and ability to learn; we'll provide education on the industry, technical training, and robust opportunities to develop your consulting skills and grow your career.

Associate Consultant

- Work directly with customers, providing expertise on Veeva's applications and platform
- Configure Veeva software under the guidance of experienced architects and project leads
- Collaborate in teams to help implement and optimize Veeva software by contributing in key roles (e.g., project management, solution design and configuration workshops, validation, integration, migration, training)

Associate Technical Consultant

- Work directly with customers and project teams, providing technical expertise on Veeva's applications, Vault Platform, APIs, and Java SDK
- Develop custom code, configure Veeva software and contribute to solution design under the guidance of experienced technical and migration architects; support content and data migration
- You will get the opportunity to participate in developing cutting edge tools used by the Veeva Services team globally
